**LEAF
SPRINGS** and U-BOLTS

2018

Distributor:

HIGH QUALITY SPRINGS

ROC offer a comprehensive range of standard and heavy duty leaf springs - both parabolic and multi-leaf designs - commonly used in the suspension systems of 4WD vehicles, light commercial vehicles, and some passenger cars.

Our philosophy is to produce the complete range of springs, and to maintain high stock levels at each of our distribution centres in Sweden, Germany, the UK, and Russia, to ensure excellent availability and short lead times for our customers.

All ROC leaf springs are guaranteed to match or exceed the quality of their OE equivalents, and can therefore be installed by authorised workshops without any warranty restrictions.

In order to guarantee customers the best service and quality, ROC are certified to ISO 9001 and ISO 14001, and also hold the EAC certificate of conformity as required for the Russian market.

In addition to leaf springs, ROC offer comprehensive ranges of coil springs, gas springs (for tailgates and bonnets), and sports springs for vehicle lowering.

ROC offer all customers high quality products, professional service, and excellent availability.

Important Information

1. General Information

- 1.1. ROC's leaf spring range covers most popular 4WD vehicles, light commercials, pick-ups and passenger cars.
- 1.2. All articles in this catalogue are stock items. We also manufacture and distribute a wide range of standard and heavy duty coil springs, sports springs, and gas springs.

2. Technical information

- 2.1. The leaf springs on a vehicle have several important functions. They carry the weight of the vehicle's body and its load, whilst also absorbing any shocks from uneven roads. During braking and acceleration, they take up forces which try to "wind up" the springs, increasing the strain at one end while it is reduced at the other.
- 2.2. Older leaf springs tended to use smooth brass bushes, whereas most modern leaf springs use rubber to metal bonded bushes for heavy vehicles, and rubber bushes for lighter vehicles. Generally all ROC springs are supplied bushed, where required.
- 2.3. Generally the models stated in this catalogue are 2WD vehicles. All other models, where we cover them, are specifically listed on separate lines. Unless specifically listed, our springs do not cover vehicles with air suspension, or custom built vehicles such as camper vans, skylifts, tipper trucks, recovery vehicles and ambulances.

3. Quality

- 3.1. ROC leaf springs are made to the highest standard from top quality steel in an ISO9001 environment. All springs are inspected and tested before delivery.
- 3.2. All ROC leaf springs are produced and finished to OEM standards.

4. Safety

- 4.1. Please carefully check the 'Build' and 'Notes' relevant to your vehicle within the catalogue when choosing your part. Other designs may exist that are not covered within our range.
- 4.2. For safety and OE handling characteristics, we recommend that leaf springs are always replaced in axle pairs.
- 4.3. Changing a spring can be a dangerous job and we therefore recommend a recognised repair manual is followed for replacement.
- 4.4. When removing a leaf spring, first unfasten the spring from the axle and then from the fitting points on the body of the vehicle.
- 4.5. Check and clean all fitting points and repair or replace them as necessary.
- 4.6. Always replace U-bolts (spring clamps).
- 4.7. When replacing a leaf spring, first fasten the spring to the fitting points on the body of the vehicle and then to the axle.
- 4.8. It is important to ensure that U-bolts (spring clamps) are properly tightened to the correct level of torque. A recognised repair manual should be followed to check the correct torque.
- 4.9. There should be no movement of the spring between the U-bolts. Any leaf spring breakage between the U-bolts will be due to insufficient tightening (allowing movement) and will not be covered by our warranty.

5. Heavy-duty springs

- 5.1. The heavy duty springs listed in this catalogue do not increase the maximum load carrying capacity of a vehicle. They are intended for vehicles that are most often loaded to near their original limit.
- 5.2. The benefits of using heavy duty springs are improved road holding and a reduced "sitting down" effect on fully loaded vehicles.

NOTES

GB		SE	
1) Please check the build and length of the original part to ensure the correct leaf spring is selected. 2) Spring supplied fitted with only one bush. 3) Spring supplied without bushes. 4) Not suitable for 4WD. 7) Replacement 2nd Leaf for LS8031. 8) Not suitable for chassis cab. 10) Please check the upper and lower spring seats on the vehicle for damage, wear or hardening, otherwise premature damage or failure of the replacement spring can occur. 11) Only suitable for vehicles with 12mm bolt (not 16mm) in the front mounting. 12) Where more than one part number is listed, check the shape and dimensions of the original u-bolt to ensure the correct item is selected. Our item may be longer than it needs to be and therefore should be cut to the correct length for the application during installation. 13) Not suitable for Liquefied Petroleum Gas (LPG). 14) Spring with a stepped centre bolt head of Ø16/Ø14mm. 15) Spring with a centre bolt head of Ø23mm. 16) Not suitable for Q17H 17) Not suitable for 16QH 18) Not suitable for LWB 19) From chassis no. 5534654 20) From chassis no. D269707 21) Only for vehicles with Chassis no. A, B or C at the 5th position. 22) Only for vehicles with Chassis no. D or E at the 5th position. 23) Pack height (thickness) at centre bolt 44mm. 24) Pack height (thickness) at centre bolt 49mm. 25) Pack height (thickness) at centre bolt 25mm. 26) Pack height (thickness) at centre bolt 22mm. 27) Pack height (thickness) at centre bolt 41mm. 28) Pack height (thickness) at centre bolt 47mm. 29) Pack height (thickness) at centre bolt 43mm.		1) Kontrollera antal blad och längd på originaldelen så att rätt bladfjäder blir vald. 2) Bladfjädern levereras endast med bussning i en ände. 3) Bladfjädern levereras utan bussningar. 4) Passar ej 4wd. 7) Ersätter blad 2 i bladfjäder LS8031. 8) Passar ej Chassi. 10) Kontrollera övre respektive nedre fjäderfästena beträffande skador, det finns annars en risk att skador uppstår på ersättningsfjädern. 11) Passar endast fordon med 12mm bult (inte 16mm) vid främre infästning. 12) I de fall där mer än ett artikelnummer finns måste dimensionerna kontrolleras och jämföras mot original så att rätt krampa väljs. Vår krampa kan vara längre än den på bilen men den ska då kapas till rätt längd vid montering. 13) Passar ej Gasol (LPG). 14) Bladfjäder med Ø16/Ø14mm centrumbultsskalle. 15) Bladfjäder med Ø23mm centrumbultsskalle. 16) Passar ej Q17H 17) Passar ej 16QH 18) Passar ej LWB 19) Från chassi.nr 5534654 20) Från chassi.nr D269707 21) Passar endast fordon där 5:e tecknet i chassinumret är A, B eller C. 22) Passar endast fordon där 5:e tecknet i chassinumret är D eller E. 23) Bladfjäderns totala tjocklek vid centrumbulten är 44mm. 24) Bladfjäderns totala tjocklek vid centrumbulten är 49mm. 25) Bladfjäderns totala tjocklek vid centrumbulten är 25mm. 26) Bladfjäderns totala tjocklek vid centrumbulten är 22mm. 27) Bladfjäderns totala tjocklek vid centrumbulten är 41mm. 28) Bladfjäderns totala tjocklek vid centrumbulten är 47mm. 29) Bladfjäderns totala tjocklek vid centrumbulten är 43mm.

NOTES

FI		DE	
1) Oikean lehtijousen valitsemiseksi tarkista ensin alkuperäisen osan rakenne ja pituus. 2) Jousi toimitetaan vain yhdellä holkillä. Vanhasta jousesta on irrotettava silmukkaa ympäröimä kuminen osa ja asennettava uuteen jouseen. 3) Jousi toimitetaan ilman holkkeja. 4) Ei 4-veto. 7) Korvaa jousipakan LS8031 toisen jousilehden. 8) Ei sovellu pelkille hyttialustoille. 10) Tarkista ylempi ja alempi jousilautanen mahdollisten kulumien tai vaurioiden varalta, muuten voi tilalle asennettava jousi mahdollisesti vaurioitua ennenaikaisesti. 11) Ainoastaan autoihin, joissa etukiinnike 12 mm pultilla (Ei 16 mm). 12) Jos on mainittu useampi vaihtoehto, tarkista alkuperäisen U-pultin muoto ja mitat varmistaaksesi oikean osan valinnan. Uusi osa saattaa olla pienempi kuin alkuperäinen ja on siksi katkaistava sopivaan mittaan asennuksen yhteydessä. 13) Ei Nestekaasu (LPG). 14) Jousen keskipultissa on porrastettu kaulus Ø16/Ø14mm. 15) Jousen keskipultin kaulus Ø23mm. 16) Ei sovellu malleihin Q17H 17) Ei sovellu malleihin 16QH 18) Ei sovellu malleihin LWB 19) Al.nrosta 5534654 20) Al.nrosta D269707 21) Vain ajoneuvoihin joiden alustanumeron 5. merkki on A, B tai C. 22) Vain ajoneuvoihin joiden alustanumeron 5. merkki on D tai E. 23) Pakan korkeus (paksuus) keskipultissa 44mm. 24) Pakan korkeus (paksuus) keskipultissa 49mm. 25) Pakan korkeus (paksuus) keskipultissa 25mm. 26) Pakan korkeus (paksuus) keskipultissa 22mm. 27) Pakan korkeus (paksuus) keskipultissa 41mm. 28) Pakan korkeus (paksuus) keskipultissa 47mm. 29) Pakan korkeus (paksuus) keskipultissa 43mm.		1) Bitte vergleichen Sie unbedingt die Abmessungen und Bauart Ihrer Originalfeder um die korrekte Feder zu verwenden . 2) Feder wird nur mit einer montierten Buchse geliefert. 3) Feder wird ohne Buchsen geliefert. 4) Nicht passend für Allrad - Fahrzeuge. 7) Ersatz für 2. Lage der Feder LS8031. 8) Nicht passend für chassis cab. 10) Bitte überprüfen Sie die oberen und unteren Federteller auf Verschleiß, ansonsten könnte es zu vorzeitigen Schäden kommen oder ein Wirkungsverlust der Feder auftreten. 11) Nur passend für Fahrzeuge mit einem 12mm Bolzen (nicht 16mm) bei der vorderen Montage. 12) Wird mehr als eine Artikelnummer gelistet , überprüfen Sie die Form und Abmessungen des ursprünglichen U-Bolt's, um den korrekten auszuwählen. Unser Artikel kann etwas länger als benötigt sein und sollte daher auf die richtige Länge für die Anwendung geschnitten werden. 13) Nicht passend für Flüssiggas (LPG). 14) Feder mit einem abgestuftem Herzbolzenkopf mit Durchmesser Ø16/Ø14mm. 15) Feder mit Herzbolzemkopf mit Durchmesser Ø23mm. 16) Nicht passend für Q17H 17) Nicht passend für 16QH 18) Nicht passend für LWB 19) Ab Chassis-Nr. 5534654 20) Ab Chassis-Nr. D269707 21) Nur für Fahrzeuge mit Chassis-Kennzeichnung "A, B oder C" an der 5. Position 22) Nur für Fahrzeuge mit Chassis-Kennzeichnung "D oder E" an der 5. NOTES

FR		PL	
1)	Controler la forme et la longueur de la lame d'origine.	1)	W celu zamontowania właściwego produktu prosimy koniecznie o porównanie jego wymiarów i konstrukcji ze sprężyną oryginalną.
2)	Lame livrée avec 1 silent-bloc. Réutiliser les silent-blocs de l'ancienne lame.	2)	Sprężynę dostarczamy tylko z jedną zamontowaną tuleją. Prosimy o użycie gumowej nakładki ze starej sprężyny w celu ponownego jej zamontowania.
3)	Lame livrée sans silent-bloc.	3)	Sprężynę dostarczamy bez tuleji.
4)	Sauf 4x4.	4)	Nie pasuje do pojazdów z napędem na cztery koła.
7)	Remplacement de la 2° lame pour LS8031.	7)	Zastępuje drugie pióro sprężyny LS8031.
8)	Sauf chassis cabine.	8)	Nie pasuje do pojazdów z numerem podwozia...
10)	Contrôler le bon état des sièges de ressorts supérieurs et inférieurs sur le véhicule afin d'éviter tout dommage ou risque de casse du ressort.	10)	Proszę sprawdzić gniazdo górnej i dolnej sprężyny czy występuje jakiegokolwiek uszkodzenie, w innym razie może nastąpić przedwczesne uszkodzenie sprężyny.
11)	Seulement approprié pour les véhicules avec boulon 12mm (pas 16mm) à l'avant.	11)	Tylko dla pojazdów ze sworzniem 12mm (nie 16mm) w przednim zawieszeniu.
12)	Lorsqu'il y a le choix entre plusieurs références, vérifiez la forme et les dimensions du boulon d'origine pour vous assurez que vous avez sélectionné la pièce adéquate. Notre référence peut être plus longue que nécessaire et devra donc être raccourcie à la longueur requise pour l'installation.	12)	Jeżeli na liście znajduje się więcej niż jeden numer, sprawdź kształt i wymiary pierwotnej śruby (w kształcie litery u), aby się upewnić, że został wybrany właściwy produkt. Nasz produkt może okazać się dłuższy niż należy; przytnij go wtedy na właściwą długość w celu zapewnienia prawidłowej instalacji.
13)	Sauf Gaz Liquéfié (LPG).	13)	Nie nadaje się do samochodów napędzanych płynnym gazem (LPG).
14)	Boulon à épaulement Ø16 Ø14mm.	14)	Sprężyna ze skróconym okrągłym łebkiem do śruby o średnicy Ø16/Ø14mm.
15)	Ressort avec boulon central de diam. 23mm.	15)	Sprężyna z okrągłym łebkiem do śruby o średnicy Ø23mm.
16)	Sauf pour Q17H	16)	Nie pasuje do Q17H
17)	Sauf pour 16QH	17)	Nie pasuje do 16QH
18)	Sauf pour LWB	18)	Nie pasuje do LWB
19)	A partir du Chassis no 5534654	19)	Od numeru nadwozia 5534654
20)	A partir du Chassis no D269707	20)	Od numeru nadwozia D269707
21)	Seulement pour véhicule dont le 5° caractère du numéro de série est A, B ou C.	21)	Tylko dla pojazdów z oznaczeniem podwozia A, B lub C na 5-tym miejscu.
22)	Seulement pour véhicule dont le 5° caractère du numéro de série est D ou E.	22)	Tylko dla pojazdów z oznaczeniem podwozia D lub E na 5-tym miejscu.
23)	L'épaisseur des ressorts sur l'axe central est de 44mm.	23)	Grubość resoru przy śrubie centralnej 44mm.
24)	L'épaisseur des ressorts sur l'axe central est de 49mm.	24)	Grubość resoru przy śrubie centralnej 49mm.
25)	L'épaisseur des ressorts sur l'axe central est de 25mm.	25)	Grubość resoru przy śrubie centralnej 25mm.
26)	L'épaisseur des ressorts sur l'axe central est de 22mm.	26)	Grubość resoru przy śrubie centralnej 22mm.

NOTES

RU	
1)	При подборе рессоры убедитесь, что ее тип и размер соответствуют параметрам оригинальной рессоры.
2)	Рессора укомплектована только одной втулкой.
3)	Рессора не укомплектована втулками.
4)	Кроме полноприводных автомобилей.
7)	Заменяет второй лист рессоры LS8031.
8)	Не подходит для малогабаритных грузовиков с кабиной на шасси без кузова.
10)	Пожалуйста, проверьте верхние и нижние точки крепления рессор на износ и повреждения, иначе может произойти преждевременная поломка рессор.
11)	Устанавливать только на автомобили с болтом 12 мм (не 16 мм) в передней точке крепления.
12)	В тех случаях, когда в списке более одного номера, проверьте форму и размеры первоначального U-болта для обеспечения правильного выбора артикула. Наше изделие может быть длиннее, чем это необходимо, и поэтому его следует сократить до правильной длины для применения во время установки.
13)	Не подходит для Сжиженного Газа (СГ).
14)	Пружина со ступенчатым центральным болтом с шляпкой Ø16/Ø14мм.
15)	Пружина с центральным болтом с шляпкой Ø23мм.
16)	Не подходит для Q17H
17)	Не подходит для 16QH
18)	Не подходит для LWB
19)	Начиная с шасси.по 5534654
20)	Начиная с шасси.по D269707
21)	Только для автомобилей с символами А, В или С в пятой позиции номера шасси.
22)	Только для автомобилей с символами D или E в пятой позиции номера шасси.
23)	Толщина рессоры в районе центрального болта – 44 мм.
24)	Толщина рессоры в районе центрального болта – 49 мм.
25)	Толщина рессоры в районе центрального болта – 25 мм.
26)	Толщина рессоры в районе центрального болта – 22 мм.
27)	Толщина рессоры в районе центрального болта – 41 мм.
28)	Толщина рессоры в районе центрального болта – 47 мм.
29)	Толщина рессоры в районе центрального болта – 43 мм.

U-Bolts

GB

- Our range of u-bolts has been designed to cover the majority of applications and are always supplied complete with nuts.
- This range is of a universal style and suitable for standard or heavy duty leaf spring applications. Many are longer than they need to be, so they should be cut to the correct length for the application during installation.
- In the majority of applications, 2 u-bolts are required per leaf spring, i.e. 4 u-bolts per axle set.
- U-bolts should be re-checked for tightness a couple of weeks after fitting. Incorrect tightening of u-bolts can cause premature failure of the leaf spring. We recommend that you follow a recognised repair manual to apply the correct torque.

SE

- Vårt sortiment av fjäderkrampor täcker de flesta av våra bladfjäderapplikationer och de levereras alltid komplett med muttrar.
- För att passa både våra standard och "Heavy Duty" bladfjädrar är gängen på kramporna i vissa fall längre än original och kan därför behöva att kapas till rätt längd. Fjäderkramporna ska alltid kontrolleras och efterdras ett par veckor efter montering.
- I de flesta fall behövs det 2 fjäderkrampor per bladfjäder, med andra ord 4 fjäderkrampor per axel.
- Oförlämpligt åtdragna fjäderkrampor kan orsaka förslitningsskador på bladfjädrarna samtidigt som det är en trafikfara. Vi rekommenderar att alltid följa reparationshandbokens åtdragningsmoment.

FI

- U-pulttivalikoimamme kattaa suurimman osan lehtijousisovelluksistamme ja ne toimitetaan aina täydellisinä muttereineen.
- Jotta ne sopisivat sekä vakio- että vahvistettuihin malleihin on U-pulttien kierre vakiomallin vastaavia pidempi, jolloin ne tarvittaessa pitää lyhentää asennuksen yhteydessä.
- Useimmissa sovelluksissa käytetään kahta U-pulttia per jousi, eli neljä U-pulttia per akseli.
- U-pultit pitää aina tarkistaa ja jälkikiristää muutama viikko asennuksen jälkeen. Väärin kiristetyt U-pultit voivat aiheuttaa ennenaikaisen vaurion lehtijousiin.
- Suosittelemme kyseisen ajoneuvon korjausoppaan antamien kiristysmomenttien seuraamista.

DE

- Unser Programm der U-Schraubbolzen ist entworfen worden, um eine Mehrheit an Anwendungen zu umfassen und wird komplett mit Muttern geliefert.
- Dieses Programm ist universell verwendbar für Standard- oder verstärkte Blattfederanwendungen.
- Viele sind länger, als sie sein müssen; sie sollten beim Einbau passend abgeschnitten werden, um die korrekte Länge für die Anwendung zu erhalten.
- In der Mehrzahl der Anwendungen werden 2 U-Bolts per Feder benötigt, 4 U-bolt für die komplette Achse.
- Ca. 2 Wochen nach Einbau sollten die U-Schraubbolzen auf Festigkeit geprüft werden. Falsches Festziehen von U-Schraubbolzen kann den vorzeitigen Ausfall von Blattfedern verursachen. Wir empfehlen, dass Sie einem anerkannten Instandsetzungshandbuch folgen, um die korrekte Drehkraft anzuwenden.

FR

- Notre gamme de brides a été conçue pour couvrir la majorité des applications. Elles sont livrées complètes avec les écrous.
- Cette gamme est de conception universelle et utilisable pour des utilisations standard ou extrêmes. Plusieurs sont livrées en longueur standard et devront être recoupées au montage.
- Dans la plupart des cas, 2 boulons en U sont préconisées par lame de ressort. Donc 4 par essieu.
- Le serrage des brides devra être contrôlé après deux semaines d'utilisation. Un serrage inadapté des brides peut causer des dommages allant jusqu'à la rupture des lames. Il est indispensable de se renseigner sur la valeur de serrage préconisée.

PL

- Nasze cybanty pokrywają większość zastosowań i są dostarczane w komplecie z nakrętkami.
- Mają one zastosowanie uniwersalne i pasują do resorów standardowych lub stosowanych w samochodach ciężarowych. Większość z nich jest dłuższa po to, aby można je było odpowiednio dopasować do pojazdu przez docięcie.
- W większości zastosowań konieczne są na sprężynę 2 U-bolty a na całą oś 4 U-bolty.
- Cybanty należy sprawdzić ponownie pod kątem dokręcenia po kilku tygodniach od montażu. Niewłaściwe dokręcenie śrub może przyczynić się w przyszłości do uszkodzenia resoru. Zalecamy zapoznanie się z instrukcją w celu zastosowania odpowiedniego momentu dokręcenia.

RU

- Наш ассортимент стремянок крепления рессоры (U-Bolts) был специально разработан для максимального охвата всех областей применения и поставляется в комплекте с гайками.
- Этот ассортимент универсален, он подходит для рессор как стандартных, так и тяжелых условий эксплуатации. Многие стремянки длиннее, чем необходимо, поэтому во время установки их следует подрезать на нужную вам длину.
- Для большинства применимостей требуются 2 u-образных болта на каждую рессору, т.е. 4 u-образных болта на комплект оси.
- Стремянки крепления рессоры рекомендуется еще раз проверить на плотность посадки через две недели после установки. Неправильное крепление рессоры может вызвать ее преждевременную поломку. Мы рекомендуем вам воспользоваться руководством по ремонту для выбора правильного момента затяжки.

Multi-Leaf Spring

- The multi-leaf spring is most commonly used on 4WD vehicles and passenger cars
- The build of the leaf spring refers to the number of leaves used in the spring
- Occasionally some multi-leaf springs are produced with a helper (auxiliary) spring, the function of this helper spring is to stop the spring from becoming inverted during load
- Where an application is listed as having a build shown as 3+1, the +1 refers to the number of helper (auxiliary) springs

Parabolic Leaf Spring

- Now the preferred design of spring by vehicle manufacturers
- Parabolic leaf springs are made from spring material specially rolled out to form a taper
- The parabolic leaf spring is usually made up of one single leaf. Although additional leaves may be used
- The parabolic design means a spring can be made to perform the same tasks of a multi-leaf spring, but with a fraction of the weight
