SPORT SPRINGS

2016

HIGH QUALITY SPRINGS

ROC - from Europe's leading spring manufacturing group - offers the widest range of standard and heavy duty replacement springs in the market.

Produced in Sweden using cold coiling technology, every ROC spring undergoes a multi-stage manufacturing process to ensure optimum performance and the longest possible service life.

All ROC springs are subject to shot peening after coiling, a process which bombards each spring with millions of tiny steel balls to introduce a positive residual stress in the spring; improving fatigue strength and preventing premature breakage.

ROC springs are protected from corrosion by a chemical compound called Zinc Phosphate, which offers galvanic or 'sacrificial' protection via preferred oxidation, i.e. the zinc corrodes before the spring steel, and generally at a slower rate, prolonging the life of the spring. Each spring is then coated with epoxy powder resin paint via electrostatics, providing further corrosion protection.

Every ROC spring is inspected and tested to ensure it meets the highest quality standards, then marked with a production code and batch number to secure full product traceability.

ROC springs are packaged in strong, attractively designed boxes; complete with application data, part number and bar-code, to ensure every customer receives the correct spring for the desired application.

All articles in this catalogue are stock items. ROC also produce a comprehensive range of coil springs, gas springs for tailgates and bonnets, and a wide range of leaf springs and U-bolts.

Important Information

1. General Information

- ROC sports springs will safely lower your car by up to 50mm, substantially improving road holding and providing a sportier driving experience. Every kit is designed to be fitted with the original shock absorbers, but gas shock absorbers can be used to further enhance the ride.
- Unless specifically stated otherwise, the listings in this catalogue are for 2WD hatchback or saloon cars with petrol engines, and not for vehicles equipped with self-levelling, eco, off-road or sport-suspension.
- All articles in this catalogue are stock items. We also manufacture and distribute a wide range of standard and heavy-duty coil springs, gas springs and leaf springs.

2. Technical Information

- The coil springs are changed on front and rear, except for cars equipped with an alternative type of suspension, for instance a torsion bar.
- The listed lowering effect in the catalogue, which is between 20 and 50 mm, is based on new cars with original springs. Cars with an OEM sport suspension have a reduced lowering effect.
- Almost all sport springs are stiffer than the original springs and that ensures better road holding. Some of the sport springs are progressively coiled.
- Standard shock absorber can be used together with our sport springs, but we recommend the use of gas shock absorbers for best possible road holding.

3. Quality

- All springs are inspected and tested before delivery, which guarantees high quality.
- All our springs are manufactured in accordance with ISO9001 & ISO14001, and in a TS16949 environment.

4. Important

- Always check that the springs diameter and end shape are correct before attempting to fit it into the spring pan.
- We recommend that instructions from a recognised repair manual are followed when fitting a spring.
- Special tools should always be used to compress a spring.
- Always take great care since a compressed spring holds a huge force and could cause serious injury if it came loose during fitment.
- Spring pans, bushings and link arms should always be checked for damage.
- After installation check that the springs are correctly located at the ends and are not too short or loose.
- Always check the wheel alignment after installation.
- For cars equipped with a self levelling system, adjustment may be required after fitting sport springs.
- For cars equipped with load dependent brakes on the rear axle, these must be checked and if necessary adjusted by an expert after fitting the sport springs.

RU Notes

- 1 Кроме машин, оборудованных в оригинале самоустанавливающейся подвеской"
- 3 Кроме 16 клапанных
- 4 Кроме полноприводных
- 5 Кроме турбо
- 6 Кроме турбодизелей
- 7 Кроме кабриолетов
- 9 Кроме дизельных
- 13 Кроме машин, оборудованных спортивным шасси.
- 16 Кроме моделей Estate
- 22 Кроме 4ws
- 25 Кроме машин с регулируемыми амортизаторами
- 28 Кроме моделей T
- 37 Кроме Coupé.
- 86 Только для машин с Y на десятой позиции номера шасси
- 93 Комплект содержит только задние пружины
- 94 Комплект содержит только передние пружины
- 95 Применимо только для автомобилей с EG № e4*98/14*007*13 и далее
- 96 Автомобили, оборудованные оригинальной спортивной подвеской, занижены на 15мм
- 97 На автомобилях, укомплектованных самоустанавливающейся подвеской, задний дорожный просвет занижается примерно на 15мм изменением положения регулировочной системы
- 98 На автомобилях, укомплектованных самоустанавливающейся задней подвеской, pivotat должен быть отрегулирован после установки наших пружин
- 99 Уменьшите резиновые отбойники передних амортизаторов на 15мм
- 100 Уменьшите резиновые отбойники передних амортизаторов на 25мм
- 101 Уменьшите отбойник задних пружин на 20мм
- 102 Кроме моделей V6
- 103 Кроме M-моделей или автомобилей с M-шасси
- 104 Кроме автомобилей с системой EDC
- 105 Кроме моделей iL
- 106 Кроме моделей Pluriel
- 107 Кроме модели Cinquecento sporting
- 108 Кроме моделей HF, HPE или Integrale
- 109 Кроме автомобилей, укомплектованных кондиционером и(или) АКПП
- 110 Для автомобилей, укомплектованных кондиционером и(или) АКПП, используйте усиленную версию (HEAVY DUTY APPLICATION)
- 111 Модели GLS & XR3i занижены на 20мм
- 112 Модели GTE & Gsi занижены на 15мм
- 113 Кроме моделей 4-Matic
- 114 Автомобили, укомплектованные Mercedes lower-ing kit (Sports Line), будут занижены на 20мм по сравнению со стандартными
- 115 Кроме моделей укомплектованных системой HGC (высокий дорожный просвет)
- 116 Для автомобилей, с нагрузкой на переднюю ось более 935кг (укомплектованных кондиционером и(или) АКПП) используйте комплект как для Omega 2,5i 24V / 3,0i 24V
- 117 Для автомобилей, с нагрузкой на переднюю ось более 845кг (укомплектованных кондиционером и(или) АКПП) используйте комплект как для Omega / Carlton 2,4 / 2,6
- 119 Модели GLT занижены на 20мм
- 120 Модели GLT & Turbo занижены на 15мм ниже чем стандартные
- 121 Передние пружины имеют конструкцию окончания "поросячий хвост"
- 122 Только для автомобилей с передними пружинами имеющими конструкцию окончания "поросячий хвост" с одной стороны
- 123 Только для автомобилей с задними пружинами имеющими конструкцию окончания "поросячий хвост" с обеих сторон
- 124 Только для автомобилей с задними пружинами имеющими конструкцию окончания "поросячий хвост" с одной сторон
- 125 Только для автомобилей с передними пружинами имеющими цилиндрическую конструкцию
- 126 Для автомобилей, с нагрузкой на переднюю ось более 975кг (укомплектованных кондиционером и(или) АКПП) используйте комплект как для Scorpio 2,9
- 127 Кроме моделей EDC
- 128 Кроме моделей 16V / 20V / 24V или Rsi
- 129 Модели Turbo занижены на 20мм
- 130 Кроме моделей CDE / CSE / V6 / Aero / Tallageda
- 131 Кроме моделей Tdi
- 132 Только для автомобилей с нагрузкой на заднюю ось максимально 1400кг
- 133 Только для автомобилей с нагрузкой на заднюю ось максимально 1460кг
- 134 Автомобили могут оснащаться оригинальными пружинами двух различных диаметров. До -8/94 внутренний диаметр пружины 80мм и после 9/94- с диаметром 70мм
- 146 Только для автомобилей с нагрузкой на заднюю ось максимально 925кг
- 147 Только для автомобилей с нагрузкой на заднюю ось максимально 760кг
